- ../source/applications/gui/ai_assistant/CMakeLists.txt

Purpose

- Show the current AI integration boundary
- from GUI and model code down to provider clients.

Required content

- genesys_tools and genesys_ai_provider static libraries
- genesys-ai-assistant-gui application
- AISupport and AIAssistant model objects
- StartAIAssistant model-specific example
- provider clients and conversation service as separate support layers

Accessibility

- A layered boundary diagram that separates
- GUI orchestration, model integration, and
- provider transport.

The source block remains the authoritative specification.
The rendered asset is a compact visual summary.
