Process / flow

Source

- ../source/applications/worker/BaseGenesysWebApplication.cpp
- ../source/applications/gui/genesys/main.cpp
- ../source/tools/main.cpp
- ../source/applications/shell/main.cpp
- ../source/applications/modelSpecific/main.cpp

Purpose

- Show the normal and error shutdown paths
- for the current application families.

Required content

- worker bind/start failure path
- main GUI event-loop exit and fatal crash path
- shell/model-specific return-code path
- tools CLI success/error exit codes

Accessibility

- A shutdown flowchart that shows how each
- executable returns control to the OS.

Validation

- The exit paths must match the current entry-point code and current log/error handling.

The source block remains the authoritative specification.
The rendered asset is a compact visual summary.
