

Current target families and their executable boundaries.

fig:dev-target-families | figure

Generated from FIGURE-SPEC comments

Matrix / catalog	
Item	Note
regression test family	See source spec
shell family	See source spec
worker family	See source spec
main GUI family	See source spec
independent GUI family	See source spec

Source

- ../CMakePresets.json
- ../README.md

Purpose

- Show which logical application family
- produces which build target.

Required content

- regression test family
- shell family
- worker family
- main GUI family
- independent GUI family

Accessibility

- A family map that lets the reader see
- which targets belong to each executable
- area.

Validation

- Each family label must match a real target name in the current tree.

The source block remains the authoritative specification.
The rendered asset is a compact visual summary.
