

Evolution of the future-event list across a replication.

fig:event-scheduling-list-evolution | figure

Generated from FIGURE-SPEC comments

Source

- source/kernel/simulator/model/ModelSimulation.cpp
- source/kernel/simulator/Event.h

Purpose

- Show how the future-event list evolves
- across initialization, processing, pause,
- and cleanup.

Required content

- queue before initialization
- queue after replication reset
- queue while processing
- queue after dispatch and cleanup

Accessibility

- A list-evolution diagram that makes the
- queue ownership and clearing rules
- visible.

Validation

- The diagram must reflect the clear/pop/delete order implemented by ModelSimulation.

The source block remains the authoritative specification.
The rendered asset is a compact visual summary.
