

Event-processing sequence inside a replication step.

fig:event-scheduling-sequence | figure

Generated from FIGURE-SPEC comments

Process / flow

Source

- source/kernel/simulator/model/ModelSimulation.cpp
- source/kernel/simulator/OnEventManager.cpp
- source/kernel/simulator/Event.h

Purpose

- Show the sequence from replication-step
- notification to event dispatch and
- after-process notification.

Required content

- replication-step notification
- future-event list access
- process-event notification
- event dispatch
- after-process-event notification

Accessibility

- A sequence diagram that makes the runtime
- callback order explicit.

Validation

- The arrows must preserve the exact order in `_stepSimulation()`.

The source block remains the authoritative specification.
The rendered asset is a compact visual summary.
