

Current failure triage and stop-gate behavior.

fig:failure-triage | figure

Generated from FIGURE-SPEC comments

Source

- ../docs/ai_assistants/GOVERNANCE.md
- ../docs/ai_assistants/STATUS.md
- ../docs/ai_assistants/runbooks/LOCAL_AGENT.md

Purpose

- Show how to classify build, test, startup, sanitizer, and scientific failures.

Required content

- build/configure failure branch
- CTest failure branch
- startup/workflow failure branch
- sanitizer failure branch
- scientific-mismatch branch

Accessibility

- A triage chart that tells the reader when
- to fix locally and when to stop and
- escalate.

Validation

- The branches must match the current governance and runbook stop rules.

The source block remains the authoritative specification.
The rendered asset is a compact visual summary.
