Generated from FIGURE-SPEC comments

Source

- models/AirportSecurityExample.gen
- source/applications/gui/genesys/mainwindow.ui
- source/applications/gui/genesys/mainwindow.cpp
- source/applications/gui/genesys/controllers/ModelInspectorController.cpp

Purpose

- Show the loaded example model inside the
- current GUI workspace.

Required content

- the model canvas with the short security flow
- the component tree
- the selected model object
- the property editor or nearby inspector

Accessibility

- A screenshot that proves the tutorial
- model is actually loaded into the GUI.

Validation

- The scene must show the current repository example, not an unrelated model.

The source block remains the authoritative specification.
The rendered asset is a compact visual summary.
