

Edited model after save and reopen.

fig:model-editing-save-reopen | figure

Generated from FIGURE-SPEC comments

Source

- source/applications/gui/genesys/controllers/ModelLifecycleController.cpp
- source/applications/gui/genesys/mainwindow.cpp
- source/applications/gui/genesys/mainwindow_modelrepresentations.cpp
- models/AirportSecurityExample.gen

Purpose

- Show the edited model after saving and
- after reopening the saved copy.

Required content

- the saved file name or tab title
- the reopened scene
- the property editor or model tree confirming the restored state
- a visible indication that the round-trip succeeded

Accessibility

- A before-and-after proof that the edited
- model persisted correctly.

Validation

- The reopened model must match the saved working copy, not the original baseline file.

The source block remains the authoritative specification.
The rendered asset is a compact visual summary.
