Source

- source/applications/gui/genesys/mainwindow.ui
- source/applications/gui/genesys/mainwindow.cpp
- source/applications/gui/genesys/services/ModelLanguageSynchronizer.h
- source/applications/gui/genesys/services/GraphicalModelSerializer.h
- models/AirportSecurityExample.gen

Purpose

- Show the current model-language editor/tab
- and a representative text excerpt.

Required content

- the model-language tab or editor surface
- a real model text excerpt
- a visible connection to the surrounding GUI

Accessibility

- A screenshot that makes it clear that the
- text is the model's serialized view, not a
- separate document.

Validation

- The visible widget labels and the excerpt structure must match the current repository code and save

The source block remains the authoritative specification.
The rendered asset is a compact visual summary.
