Source

- source/kernel/simulator/model/Model.h
- source/kernel/simulator/model/Model.cpp
- source/kernel/simulator/model/ModelDataManager.h
- source/kernel/simulator/model/ModelComponentManager.h
- source/kernel/simulator/model/ModelDataDefinition.h
- source/kernel/simulator/model/ModelDataDefinition.cpp

Purpose

- Show the in-memory ownership and registry
- layout that persistence must preserve.

Required content

- the Model object at the center
- owned managers and runtime services
- the split between ModelDataManager and ModelComponentManager
- internal and attached data relationships

Accessibility

- A structural diagram that makes the
- ownership boundary and registry split
- obvious at a glance.

Validation

- The diagram must match the current class ownership and registry responsibilities in the code.

The source block remains the authoritative specification.
The rendered asset is a compact visual summary.
