

Current maturity map for model-specific examples.

fig:model-specific-maturity-map | figure

Generated from FIGURE-SPEC comments

Source

- source/applications/modelSpecific/modelSpecificApps.tsv
- scripts/regenerate-models-from-modelspecific.sh
- build/modelspecific-validation/logs/

Purpose

- Summarize the maturity split between
- reproducible examples, validation-only
- exercises, and snapshot-only entries.

Required content

- supportable examples
- validation-only smarts
- snapshot-only historical cases
- override/legacy handling

Accessibility

- A maturity chart that distinguishes
- reproducibility from mere presence in the
- source tree.

Validation

- The labels must match the current validation evidence and the current override file.

The source block remains the authoritative specification.
The rendered asset is a compact visual summary.
