

Current CI topology and claim boundaries.

fig:packaging-ci-topology | figure

Generated from FIGURE-SPEC comments

Source

- ../github/workflows/genesys-ci.yml
- ../README.md
- ../docs/ai_assistants/STATUS.md
- ../CMakePresets.json

Purpose

- Show the current CI topology, triggers,
- environment, and the split between

Required content

- PR/workflow_dispatch triggers
- ubuntu-24.04 runner
- offscreen Qt environment
- tests-unit configure/build/test path
- GUI GMDD diagnostics path

Accessibility

- A pipeline diagram that makes the current
- CI jobs and their claims explicit.

Validation

- The workflow names, runner, presets, and trigger branches must match the
- current YAML.

The source block remains the authoritative specification.
The rendered asset is a compact visual summary.
