

Current Debian package contents and install layout.

fig:packaging-package-layout | figure

Generated from FIGURE-SPEC comments

Source

- ../debian/control
- ../debian/rules
- ../debian/genesys-gui.install
- ../debian/genesys-web.install
- ../packaging/linux/io.github.rlcancian.genesys.desktop
- ../packaging/linux/io.github.rlcancian.genesys.metainfo.xml

Purpose

- Show the installed filesystem layout and
- the current package dependency

Required content

- /usr/bin/genesys-gui
- /usr/bin/genesys-web
- desktop file
- metainfo file
- icon path

Accessibility

- A package contents diagram with the
- desktop application on one side and the

Validation

- The file paths and package names must match the current Debian manifests.

The source block remains the authoritative specification.
The rendered asset is a compact visual summary.
