

Current release boundary for packaging and CI.

fig:packaging-release-boundary | figure

Generated from FIGURE-SPEC comments

Source

- ../github/workflows/genesys-ci.yml
- ../github/workflows/genesys-debian-package.yml
- ../docs/ai_assistants/GOVERNANCE.md
- ../docs/ai_assistants/STATUS.md
- ../docs/ai_assistants/BACKLOG_HUMAN.md

Purpose

- Show the boundary between CI/package
- validation and release authorization,

Required content

- CI validation box
- Debian package validation box
- metadata checks
- release or publication gate
- human approval boundary

Accessibility

- A gate diagram that distinguishes
- technical validation from release
- approval.

Validation

- The diagram must not suggest that package build success alone authorizes
- release.

The source block remains the authoritative specification.
The rendered asset is a compact visual summary.
