

Grouped result charts rendered from simulation aggregates.

fig:results-plots | figure

Generated from FIGURE-SPEC comments

Source

- source/applications/gui/genesys/mainwindow.cpp
- source/applications/gui/genesys/mainwindow.ui
- source/kernel/simulator/model/ModelSimulation.cpp

Purpose

- Show the grouped result charts rendered in
- the reports plots tab.

Required content

- the plots tab or scroll area
- one or more grouped charts
- visible labels for the plotted result categories

Accessibility

- A chart screenshot that makes the summary
- trend by category visible.

Validation

- The chart type and grouping must match the current custom plot widget.

The source block remains the authoritative specification.
The rendered asset is a compact visual summary.
