Source

- source/applications/gui/genesys/dialogs/dialogsimulationconfigure.ui
- source/applications/gui/genesys/dialogs/dialogsimulationconfigure.cpp
- source/kernel/simulator/model/ModelSimulation.h
- source/kernel/simulator/model/ModelSimulation.cpp

Purpose

- Show the current simulation configuration
- dialog and its real execution fields.

Required content

- the Configure Simulation window
- the Model Simulation tab
- the Simulation Report tab
- the Parallelization tab or its placeholder controls

Accessibility

- A dialog screenshot that makes the current
- execution parameters visible.

Validation

- The visible labels and fields must match the repository code and not a mockup.

The source block remains the authoritative specification.
The rendered asset is a compact visual summary.
