

Focused sanitizer workflow for the plugin-completion lifetime test.

fig:sanitizer-workflow | figure

Generated from FIGURE-SPEC comments

Process / flow

Source

- ../source/tests/CMakeLists.txt
- ../docs/ai_assistants/GOVERNANCE.md
- ../docs/ai_assistants/STATUS.md

Purpose

- Show the focused sanitizer path and its
- explicit leak-detection settings.

Required content

- focused executable target
- sanitizer compile/link flags
- runtime ASAN/LSAN settings
- narrow scope warning

Accessibility

- A flow diagram that shows why one
- sanitizer check is useful but not
- exhaustive.

Validation

- The flags and environment variables must match the current source file.

The source block remains the authoritative specification.
The rendered asset is a compact visual summary.
