

Terminal result after a real shell command.

fig:shell-terminal-result | figure

Generated from FIGURE-SPEC comments

Source

- source/applications/shell/GenesysShell.cpp
- source/kernel/simulator/SimulationReporterDefaultImpl1.cpp
- source/kernel/simulator/model/ModelSimulation.cpp

Purpose

- Show a real terminal result produced after
- loading and checking a model, or after
- starting a short run.

Required content

- the command that was executed
- the immediate terminal response
- any follow-up line that proves the command had effect

Accessibility

- A result screenshot that proves the shell
- is doing real work, not only echoing
- prompts.

Validation

- The shown output must be produced by the current shell or facade code.

The source block remains the authoritative specification.
The rendered asset is a compact visual summary.
