Generated from FIGURE-SPEC comments

Process / flow

Source

- ../source/applications/gui/genesys/controllers/DialogUtilityController.cpp
- ../source/applications/gui/genesys/controllers/ModelLifecycleController.cpp
- ../source/applications/gui/genesys/dialogs/dialogpluginmanager.cpp
- ../source/applications/gui/genesys/mainwindow.cpp
- ../source/applications/shell/GenesysShell.cpp

Purpose

- Show how the reader moves from symptom to
- console, dialog, or subsystem-specific
- recovery path.

Required content

- model open/check branch
- parser branch
- plugin branch
- worker/tool branch
- log/reporting branch

Accessibility

- A flowchart that turns the chapter's prose
- into a concrete debugging sequence.

Validation

- The flow must not claim more validation than the current code and status documents support.

The source block remains the authoritative specification.
The rendered asset is a compact visual summary.
