Installed and build-...

installed...

desktop...

build-tree...

Source

- debian/genesys-gui.install
- CMakePresets.json
- packaging/linux/io.github.rlcancian.genesys.desktop

Purpose

- Show the installed binary and the
- equivalent local build-tree path.

Required content

- installed binary path
- desktop launcher path
- build-tree executable path

Accessibility

- Side-by-side installed and build-tree
- executable locations.

Validation

- Paths must be current and directly runnable where applicable.

The source block remains the authoritative specification.
The rendered asset is a compact visual summary.
