

Supported installation and first-start flow for GenESyS.

fig:user-installation-flow | process diagram

Generated from FIGURE-SPEC comments

Process / flow

Source

- debian/control
- debian/rules
- debian/genesys-gui.install
- CMakePresets.json
- packaging/linux/io.github.rlcancian.genesys.desktop

Purpose

- Show the supported installation and
- first-start sequence for users.

Required content

- supported Debian package path
- optional local artifact path
- installed launcher name
- first GUI startup
- About-dialog version check

Accessibility

- Flowchart from package acquisition to a
- successful GUI launch.

Validation

- Every node must match the current packaging and preset files.

The source block remains the authoritative specification.
The rendered asset is a compact visual summary.
