

Current validation ladder and claim boundaries.

fig:validation-ladder | figure

Generated from FIGURE-SPEC comments

Source

- ../docs/ai_assistants/STATUS.md
- ../docs/ai_assistants/history/evidence/2026/07/VALIDATION_LEDGER.md
- ../source/tests/CMakeLists.txt

Purpose

- Show how build, test, smoke, sanitizer,
- and scientific validation relate to one
- another.

Required content

- build/configure step
- regression/unit step
- smoke step
- focused sanitizer step
- scientific validation step

Accessibility

- A ladder diagram that explains the
- difference between coverage depth and
- claim strength.

Validation

- The ordering must preserve the distinction between runtime evidence and scientific validation.

The source block remains the authoritative specification.
The rendered asset is a compact visual summary.
