

Current Worker composition roots and the reusable embedded runtime.

fig:worker-architecture-runtime-map | figure

Generated from FIGURE-SPEC comments

Source

- ../source/applications/worker/BaseGenesysWebApplication.h
- ../source/applications/worker/BaseGenesysWebApplication.cpp
- ../source/applications/worker/service/WebWorkerRuntime.h
- ../source/applications/worker/service/WebWorkerRuntime.cpp
- ../source/applications/worker/CMakeLists.txt

Required content

- genesys-worker standalone process
- genesys_worker_app target and alias
- WebWorkerRuntime embedded lifecycle object
- shared worker core stack
- CLI arguments for port and request cap

Accessibility

- A composition-root diagram that
- distinguishes the standalone process from
- the reusable embedded runtime.

Validation

- Every node must correspond to a real class, target, or entry point in the current tree.

The source block remains the authoritative specification.
The rendered asset is a compact visual summary.
