the separate...

Source

- ../CMakePresets.json
- ../README.md

Purpose

- Present the current configure, build, and
- test preset families with their build
- trees.

Required content

- configure preset names
- matching build preset names
- matching test preset names
- the separate build directory for each family

Accessibility

- A matrix or table that lets the reader
- choose the correct preset without
- guessing.

Validation

- The displayed preset names must match the current preset inventory.

The source block remains the authoritative specification.
The rendered asset is a compact visual summary.
