

Lifecycle of a single scheduled event.

fig:event-scheduling-lifecycle | figure

Generated from FIGURE-SPEC comments

Process / flow

Source

- source/kernel/simulator/model/ModelSimulation.h
- source/kernel/simulator/model/ModelSimulation.cpp
- source/kernel/simulator/Event.h

Purpose

- Show the lifecycle of a single scheduled
- event from insertion into the future-event
- list to deletion after dispatch.

Required content

- event creation
- insertion into the future-event list
- selection as the next event
- dispatch
- post-process notification
- deletion

Accessibility

- A lifecycle diagram that makes the
- ownership and runtime transitions
- explicit.

The source block remains the authoritative specification.
The rendered asset is a compact visual summary.
