

Lifecycle of a simulation replication.

fig:event-scheduling-replication-lifecycle | figure

Generated from FIGURE-SPEC comments

Process / flow

Source

- source/kernel/simulator/model/ModelSimulation.cpp
- source/kernel/simulator/SimulationReporterDefaultImpl1.cpp

Purpose

- Show the lifecycle of a replication,
- including initialization, execution,
- termination, and reporting.

Required content

- simulation initialization
- replication start
- replication execution loop
- replication termination conditions
- replication report emission

Accessibility

- A lifecycle diagram that separates
- simulation-wide and per-replication work.

Validation

- The sequence must reflect start(), _initSimulation(), _initReplication(), _replicationEnded(), and _simu

The source block remains the authoritative specification.
The rendered asset is a compact visual summary.
