

Trace view for the first baseline execution.

fig:first-model-trace | figure

Generated from FIGURE-SPEC comments

Source

- source/applications/gui/genesys/mainwindow.ui
- source/kernel/simulator/model/ModelSimulation.cpp
- source/kernel/trace/TraceManager.h

Purpose

- Show the trace or event log produced by
- the first run.

Required content

- ordered event messages
- at least one arrival, one processing step, and one branch result
- the event-level trace setting used for the example

Accessibility

- A readable trace view that connects the
- flow diagram to runtime behavior.

Validation

- The trace must match the baseline example and show real runtime messages.

The source block remains the authoritative specification.
The rendered asset is a compact visual summary.
