- ../source/applications/gui/genesys/controllers/ModelLifecycleController.cpp
- ../source/applications/gui/genesys/mainwindow.cpp
- ../source/applications/gui/genesys/services/GraphicalModelSerializer.h
- ../source/applications/gui/genesys/services/ModelLanguageSynchronizer.h

Purpose

- Show the current open/recent-file/load
- sequence and where the GUI refreshes state
- afterward.

Required content

- the action trigger and wrapper slot
- the lifecycle controller
- the load callback and companion-file preference
- the UI refresh and recent-file update path

Accessibility

- A sequence diagram that helps maintainers
- follow the model-open path from the menu
- to the scene.

Validation

- The sequence must match the current load path for .gui and .gen inputs.

The source block remains the authoritative specification.
The rendered asset is a compact visual summary.
