Source

- ../source/kernel/simulator/Simulator.h
- ../source/kernel/simulator/model/ModelManager.h
- ../source/kernel/simulator/PluginManager.h
- ../source/kernel/simulator/TraceManager.h
- ../source/kernel/simulator/ParserManager.h
- ../source/kernel/simulator/ExperimentManager.h
- ../source/kernel/simulator/model/Model.h

Purpose

- Show the current manager roster and the
- dependencies between top-level kernel
- services and model-level services.

Required content

- manager map
- dependency arrows
- model-level services separated from simulator-level services

Accessibility

- A manager dependency diagram that helps
- the reader distinguish the kernel facade
- from the model runtime.

Validation

- Every object must exist in the current tree and each edge must match a current constructor, getter,

The source block remains the authoritative specification.
The rendered asset is a compact visual summary.
