Purpose

- Show the confirmed ownership boundaries
- and teardown responsibilities.

Required content

- owning arrows from managers to managed objects
- non-owning arrows for back-references
- explicit note that raw pointers do not imply ownership

Accessibility

- A diagram that tells the reader which
- pointers are lifetime-owning and which
- ones are observers/back-references.

Validation

- The diagram must follow the actual delete paths and must not classify any raw pointer as owning with

The source block remains the authoritative specification.
The rendered asset is a compact visual summary.
