

Kernel startup sequence from simulator creation to model readiness.

fig:kernel-startup-sequence | figure

Generated from FIGURE-SPEC comments

Process / flow

Source

- ../source/kernel/simulator/Simulator.cpp
- ../source/kernel/simulator/model/Model.cpp
- ../source/kernel/simulator/model/ModelManager.cpp

Purpose

- Show the startup order from Simulator
- construction to a ready Model instance.

Required content

- Simulator constructor
- manager creation order
- ModelManager::newModel
- Model constructor and its owned runtime services

Accessibility

- A sequence diagram that helps the reader
- see which object is instantiated first and
- which runtime services are created inside
- the model.

Validation

- The sequence must match the actual constructor calls and the new-model path.

The source block remains the authoritative specification.
The rendered asset is a compact visual summary.
