Source

- source/applications/gui/genesys/controllers/PropertyEditorController.cpp
- source/applications/gui/genesys/mainwindow.cpp
- source/applications/gui/genesys/mainwindow.ui
- models/AirportSecurityExample.gen

Purpose

- Show one deliberately invalid property
- value before validation is run.

Required content

- the selected component in the property editor
- one property field containing an invalid or incomplete value
- the edited scene in the background or nearby

Accessibility

- The invalid state must be visually obvious
- without needing to inspect raw files.

Validation

- The property shown must be one that the model actually exposes in the current GUI.

The source block remains the authoritative specification.
The rendered asset is a compact visual summary.
