

Logical schema of the current \texttt{.gen}

fig:model-persistence-gen-schema | figure

Generated from FIGURE-SPEC comments

Source

- source/kernel/simulator/persistence/GenSerializer.h
- source/kernel/simulator/persistence/GenSerializer.cpp
- source/kernel/simulator/persistence/Persistence.h
- source/kernel/simulator/persistence/PersistenceDefaultImpl2.cpp

Purpose

- Show the logical layout of the GenESyS
- text format as emitted today.

Required content

- header comments
- simulator/model metadata block
- model data definitions section
- model components section
- representative field layout for one serialized entry

Accessibility

- A schema sketch that helps the reader
- understand what appears on each line.

Validation

- The diagram must reflect the current linearization order and section grouping.

The source block remains the authoritative specification.
The rendered asset is a compact visual summary.
