Generated from FIGURE-SPEC comments

Process / flow

Source

- source/kernel/simulator/model/Model.cpp
- source/kernel/simulator/persistence/PersistenceDefaultImpl2.cpp
- source/kernel/simulator/model/ModelManager.cpp

Purpose

- Show the current load path, including
- clear(), plugin dispatch, and reconnect.

Required content

- Model::load entry point
- model clear/reset step
- serializer/parser selection by extension
- plugin-based instantiation
- deferred component reconnection

Accessibility

- A step-by-step diagram that explains why
- the file is parsed before connections are
- restored.

Validation

- The diagram must match the current loader behavior, including the unsupported .cpp load path.

The source block remains the authoritative specification.
The rendered asset is a compact visual summary.
