Source

- source/applications/modelSpecific/modelSpecificApps.tsv
- source/applications/modelSpecific/arenaExamples/
- source/applications/modelSpecific/smarts/
- source/applications/modelSpecific/teaching/
- source/applications/modelSpecific/wcm/

Purpose

- Show the current catalog by family,
- generation behavior, and maturity.

Required content

- family buckets
- examples that generate .gen files
- examples that are validation-only exercises
- examples still needing revalidation

Accessibility

- A catalog matrix that separates
- user-friendly examples from historical or
- feature-exerciser snapshots.

Validation

- The matrix must match the current script discovery and the current override file.

The source block remains the authoritative specification.
The rendered asset is a compact visual summary.
