Process / flow

Source

- source/kernel/simulator/SimulationReporterDefaultImpl1.cpp
- source/applications/gui/genesys/controllers/TraceConsoleController.cpp
- source/applications/gui/genesys/mainwindow.cpp
- source/applications/gui/genesys/mainwindow_simulator.cpp
- source/tools/Statistics/SimulationResultsDatasetParser.cpp

Purpose

- Show the flow from simulation data to
- report text, table, plots, and offline
- analysis.

Required content

- kernel statistics and counters
- reporter output
- GUI text/table/plot sinks
- offline dataset analysis entry point

Accessibility

- A flow diagram that explains how numeric
- results reach the user-visible panes.

Validation

- Every arrow and sink must correspond to an actual code path or documented tool.

The source block remains the authoritative specification.
The rendered asset is a compact visual summary.
