

Comparison of results across replications.

fig:results-replication-comparison | figure

Generated from FIGURE-SPEC comments

Source

- source/kernel/simulator/SimulationReporterDefaultImpl1.cpp
- source/tools/Statistics/SimulationResultsDatasetParser.cpp
- source/tools/README_tools.md
- source/applications/gui/genesys/mainwindow.cpp

Purpose

- Show a comparison between two or more
- replications using the current reporting
- output.

Required content

- at least two replication summaries or equivalent comparison rows
- a visible shared metric across replications
- the replication identifiers or headings

Accessibility

- A comparison screenshot that makes
- run-to-run differences readable.

Validation

- The compared numbers must come from the current replication report or dataset parser.

The source block remains the authoritative specification.
The rendered asset is a compact visual summary.
