

Aggregated simulation results table.

fig:results-table | figure

Generated from FIGURE-SPEC comments

Matrix / catalog	
Item	Note
the reports results table	See source spec
statistic rows and/or...	See source spec
the current column set	See source spec

Source

- source/applications/gui/genesys/mainwindow.cpp
- source/kernel/simulator/model/ModelSimulation.cpp
- source/kernel/simulator/model/ModelSimulation.h
- source/kernel/simulator/essentialPlugins/StatisticsCollector.h
- source/kernel/simulator/essentialPlugins/Counter.h

Purpose

- Show the aggregated results table
- populated after a simulation run.

Required content

- the reports results table
- statistic rows and/or counter rows
- the current column set

Accessibility

- A screenshot that exposes the summary
- metrics in tabular form.

Validation

- The visible columns must match the table header setup in code.

The source block remains the authoritative specification.
The rendered asset is a compact visual summary.
