Generated from FIGURE-SPEC comments

Source

- source/applications/gui/genesys/controllers/TraceConsoleController.cpp
- source/applications/gui/genesys/mainwindow.ui
- source/applications/gui/genesys/mainwindow.h
- source/applications/gui/genesys/mainwindow_simulator.cpp

Purpose

- Show the live trace surfaces used during simulation execution.

Required content

- the main console trace pane
- the simulation trace pane
- a representative live event or results line

Accessibility

- A screenshot that distinguishes console traces from simulation traces during a run.

Validation

- The visible pane labels and routing must match the current GUI code.

The source block remains the authoritative specification. The rendered asset is a compact visual summary.
