

Paused simulation with step and resume available.

fig:running-simulations-paused | figure

Generated from FIGURE-SPEC comments

Source

- source/applications/gui/genesys/mainwindow.cpp
- source/applications/gui/genesys/mainwindow.ui
- source/kernel/simulator/model/ModelSimulation.cpp

Purpose

- Show the GUI while a simulation is paused
- and ready for step or resume.

Required content

- a visible paused state
- the enabled Resume and Step actions
- the locked editing widgets or controls

Accessibility

- A runtime screenshot that makes the paused
- state and the next available actions
- obvious.

Validation

- The enabled and disabled controls must match the paused-state gating in the code.

The source block remains the authoritative specification.
The rendered asset is a compact visual summary.
