Process / flow

Source

- source/applications/gui/genesys/mainwindow.cpp
- source/kernel/simulator/model/ModelSimulation.cpp
- source/applications/gui/genesys/dialogs/dialogsimulationconfigure.ui

Purpose

- Show the full start-to-end flow from configuration to completion.

Required content

- configuration dialog
- active run state
- paused or stepped state
- completion or stopped state

Accessibility

- A compact sequence image that shows the practical execution lifecycle in one view.

Validation

- The sequence must follow the same command ordering as the code path in the GUI.

The source block remains the authoritative specification.
The rendered asset is a compact visual summary.
