

Automated shell execution through argv or script input.

fig:shell-automation | figure

Generated from FIGURE-SPEC comments

Source

- source/applications/shell/GenesysShell.cpp
- source/applications/shell/main.cpp

Purpose

- Show a small scripted or argv-driven session that demonstrates automation.

Required content

- an argv-driven command or execute-script run
- the echoed command lines
- a real output line from the shell

Accessibility

- A screenshot that demonstrates the non-interactive shell path.

Validation

- The session must use a command path confirmed in the current source.

The source block remains the authoritative specification.
The rendered asset is a compact visual summary.
