

Current Genesys shell command families.

fig:shell-command-flow | figure

Generated from FIGURE-SPEC comments

Process / flow

Source

- source/applications/shell/GenesysShell.cpp
- source/applications/shell/GenesysShell.h

Purpose

- Show the current command families and how
- they map to the shell handlers.

Required content

- the main command groups
- the special grouped commands with topic help
- the automation and inspection branches

Accessibility

- A diagram that helps the reader understand
- how the shell routes each command family.

Validation

- The groups and labels must match the current command definitions.

The source block remains the authoritative specification.
The rendered asset is a compact visual summary.
