

Complete terminal session for the Genesys shell.

fig:shell-session | figure

Generated from FIGURE-SPEC comments

Source

- source/applications/shell/main.cpp
- source/applications/shell/GenesysShell.cpp
- source/applications/shell/GenesysShell.h
- source/applications/shell/CMakeLists.txt

Purpose

- Show a complete terminal session from startup prompt through a clean exit.

Required content

- the shell prompt
- the startup message
- plugin autoload output or its failure message
- at least one successful command and the quit command

Accessibility

- A terminal screenshot that proves the shell starts, accepts commands, and exits cleanly.

Validation

- The visible prompt and messages must match the current shell implementation.

The source block remains the authoritative specification.
The rendered asset is a compact visual summary.
