

Current worker security boundary.

fig:worker-security-boundary | figure

Generated from FIGURE-SPEC comments

Source

- source/applications/worker/http/SimpleHttpServer.cpp
- source/applications/worker/BaseGenesysWebApplication.cpp
- source/applications/worker/README.md
- source/applications/mcp/README.md

Required content

- local or private-network boundary
- TCP/HTTP transport without TLS
- token-protected API branches
- per-session workspace isolation
- explicit "do not expose publicly" annotation

Accessibility

- A boundary diagram that makes the security
- assumptions and the non-production
- authentication model visible.

Validation

- The diagram must not imply public Internet approval or TLS support that the code does not provide.

The source block remains the authoritative specification.
The rendered asset is a compact visual summary.
